

# Transporeon Rate Management

Searching for one version of the truth? Rate Management has the power to deliver full transparency of rates and contracts in real-time, and provide fast access to complex calculations and information, in a highly secure online environment. Save valuable resources and enhance collaboration across your whole organization with Rate Management.

## CHALLENGES

### LACKING RATE TRANSPARENCY

Comparing rates, prices and service options for all modes is resource-heavy and data often lacks transparency

### DIFFERENT NEEDS AND LEVEL OF KNOWLEDGE

Showing complex information clearly to users with different needs and highly differentiating logistics knowledge e.g. users from sales team, accounting, procurement, logistics

### INFRASTRUCTURE

Giving access to central rate information worldwide, across different sites and departments to a huge number of verified users

### DATA QUALITY AND TIMELINESS

Keeping a variety of often volatile data on a daily basis, currently and comprehensible for every site and every relation

## FEATURES

- > All rates and surcharges stored and maintained in one central online location.
- > Rate Query Engine handles multiple currencies, fuel and other surcharges, and volumetric conversion to determine total chargeable cost per available carrier within seconds.
- > Full control and traceability over any changes to rates and table structures.
- > Single Sign-On using enterprise credentials ensures user access is actively controlled and secure.
- > Rate tables and rate structures are fully customizable, making it possible to work with any rate card or routing guide for all transport modes.
- > Interface capabilities supporting third party integrations and ERP systems enable smooth implementation within your existing IT landscape. Flexibility of handling existing data is increased with easy Excel/CSV upload/download functionality.
- > Rate Management module is currently available in 26 languages. Support is currently available in 8 languages.

**HOW IT WORKS**

**BENEFITS**

- Full organization-wide transparency into rates and contracts in real-time creates one single point of truth. Always-on platform supports round-the-clock availability of up-to-date rate data, minimizes risk of mistakes, and delivers significant time and resource savings.
- Realize savings on shipment costs with access to most economical transport modes. Complex rate comparison for multiple shipment modes is simplified when using the Rate Query Engine (e.g. air vs. ocean, ocean vs. rail) and delivers the ideal blend of price and service levels.
- Digitize the rate approval process with your carriers via workflows, to avoid manual workload and ensure use of carrier-validated rates.
- Secure by design, Rate Management prevents uncontrolled access to rate data and provides a history of rate revisions.

“Rate Management is the perfect solution for companies like ours that use and maintain large numbers of freight rates, for all modes of transport.”
