Freight Audit
SelfService

Struggling with freight audits and overpaying on invoices?

Freight Audit SelfService takes the hassle out of managing your freight costs. Traditional methods are slow, error-prone, and can lead to delayed payments. While fully managed solutions exist, they can be complex, expensive, and require a time-intensive setup.

Freight Audit SelfService is a low-threshold, self-service option designed for shippers who want to maintain control over the process while achieving accuracy, transparency, and efficiency. Get started quickly with our plug-and-play setup and free yourself from the burden of manual audits.

CHALLENGES

MANUAL WORKLOAD

Traditional methods involve manual tasks like scanning, coding, booking, and auditing invoices, consuming valuable resources.

UNRELIABLE INVOICES

Shippers rely on carriers to provide accurate invoices, but errors are common, leading to wasted time and effort resolving disputes.

LIMITED VISIBILITY

Dispute resolution is often opaque, with information scattered across emails, calls, and approvals. This lack of transparency makes it difficult to track

COMPLIANCE RISKS

Manual processes increase the risk of accepting non-compliant invoices, potentially leading to financial losses and legal issues.

HIDDEN COSTS

Inaccuracies and inefficiencies can lead to overpayments or non-compliant invoices, resulting in financial losses and potential legal issues.

FEATURES

〉 **AUTOMATED INVOICE PROCESSING**
Eliminates manual workload by automating booking and audit processes.

〉 **TRANSPARENCY & TRACEABILITY**
Provides clear visibility into billing and dispute processes.

〉 **REAL-TIME ACCRUALS**
Offers real-time tracking of financial accruals for better financial planning.

〉 **PLUG & PLAY SETUP**
Pre-populated transport data from the Transporeon platform allows for automatic connection and immediate access to automated audits. No complex setup needed.
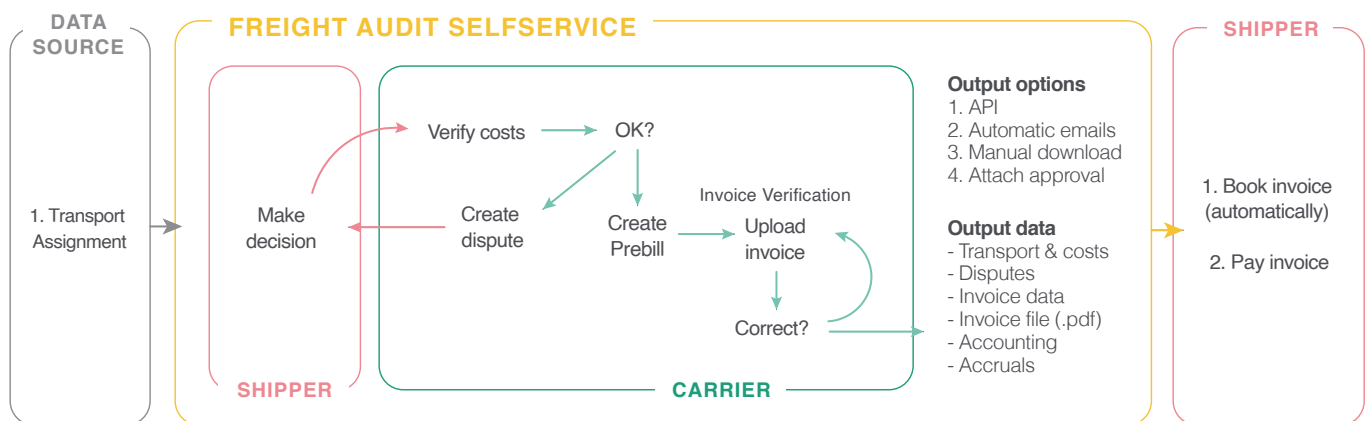

〉 **CLOSED LOOP ORDER TO PAY**
Manages the entire order-to-pay process with exception management.

HOW IT WORKS

1 **MANAGE SELF-BILLING:** Verify costs, dispute with carriers and confirm final settlements for accurate self-billing.

2 **AUTOMATE INVOICING:** Carriers manage costs, disputes and pre-bills. You receive only verified invoices for payment.

BENEFITS

〉 **REDUCED MANUAL WORKLOAD**
Automation minimises the need for manual data entry and processing.

〉 **ENHANCED ACCURACY**
Ensures all invoices are correct in terms of cost, tax, and further requirements.

〉 **IMPROVED TRANSPARENCY**
Real-time tracking and visibility into billing and disputes

〉 **EFFICIENT EXCEPTION MANAGEMENT**
Only manage disputes, allowing focus on critical issues.

〉 **SEAMLESS INTEGRATION**
Integration with Transporeon´s Transport Execution solution, ensuring smooth data

"Our decision for Transporeon´s Freight Audit SelfService has been a catalyst for greater efficiency. We've seen a significant reduction in manual workload, and the added visibility into our freight costs has improved our overall planning. The automatic invoice processing optimised our operations, allowing us to focus on core activities. **We highly recommend this solution to any shipper looking for an easy-to-use, low-threshold solution to enhance their freight audit process."**
