

Transporeon Planner

Digitalization has become the new key to success. Keeping up with the market needs and trends, Transporeon now features as a mobile application called Transporeon Planner. With the mobile application we are providing instant accessibility to Transporeon anywhere and anytime. Transporeon Planner enables carriers who are always on the move or manage their business with mobile devices. They can now easily carry out business activities like accepting or rejecting transport, checking transport details, etc. with just a few clicks. In future carriers will also be able to book time slots, have real-time visibility and much more.

CHALLENGES

LESS TIME, MORE WORK

Carriers often find themselves under time, cost and revenue pressure. They must be available 24/7 not only on desktop but also on mobile to meet the needs of the business.

ALWAYS MULTITASKING

Many times, carriers are multitasking like driving, traffic conditions, paperwork, GPS, reaching on schedule. Some carriers often handle two tasks: driving and planning.

DIFFICULT TO KEEP TRACK OF TRANSPORT

Carriers need to respond to new transport requests quickly, check transport details and manage pricing and costs. A slight modification in transport request needs complete replanning and rescheduling.

NEED FOR IT- INFRASTRUCTURE

There is always a need to invest in IT infrastructure to enable carriers to run businesses. Many carriers in emerging as well as in developed markets rely on mobile devices to manage their business.

LACK OF DIGITAL BACK-UPS

There is a heavy reliance on paper for information backup as much of the work is done via phone calls.

FEATURES

› **TRANSPOREON FEATURES AS MOBILE APPLICATION**
With the mobile application carriers can access Transporeon anywhere and anytime

› **DETAILED INFORMATION ABOUT THE TRANSPORT**
Carriers will have instant access to all the details regarding transport and delivery

› **ACCEPT OR REJECT TRANSPORT**
Carriers can easily respond to customer requests by accepting or rejecting transport with a simple click

› **NO-TOUCH ORDER**
Currently carriers can receive transports from shippers using Transporeon's assignment method No-Touch Order

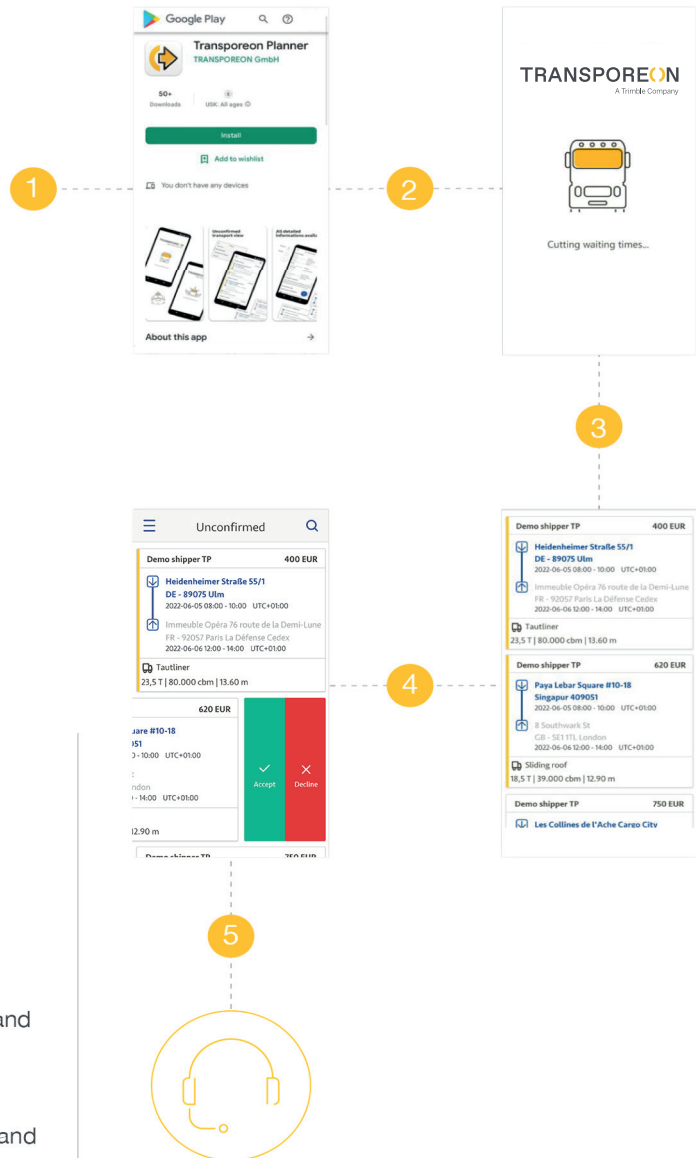

› **PUSH NOTIFICATIONS**
With the help of notification carriers can easily manage and track their business with few clicks

› **LOCAL LANGUAGE SUPPORT**
Transporeon Planner will support all the languages which are supported by the Transporeon platform

* There will be a significant increase in the functionality of the app e.g. transport via Best-Carrier method, Time Slot Management, Visibility and much more in coming months.
